**DETAILED ACTION**

The following is an examiner's statement of reasons for allowance: The present invention is directed to configuring a Noise Vcoded speech signal for electronic devices. Independent claims 1, 2, 6, 7, 11, 12, 16 and 17 identify the uniquely distinct feature of a noise source generating a noise for deteriorating an input sound signal and configuring a noise-vocoded speech signal for specific electronic devices in combination with all the disclosed limitations of claims 1, 2, 6, 7, 11, 12, 16 and 17. The closest prior art Wright (US 6109107) discloses a method an apparatus for treating language based learning impairments but does not teach inputting a noise to generate a noise vocoded output signal (See applicant's response page 19 last paragraph to page 21, second paragraph) and Sterner et al. (US 5303327) discloses a method of screening communication functions by providing a stimulus to a subject and scoring the response to the stimulus but does not teach changing frequency band boundaries of band filters (See applicant's response page 23, last paragraph to page 24, first paragraph). The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:00 AM - 2:30 PM.
